Par savjeta budućim programerima

Iz iskustva sadašnjeg programera

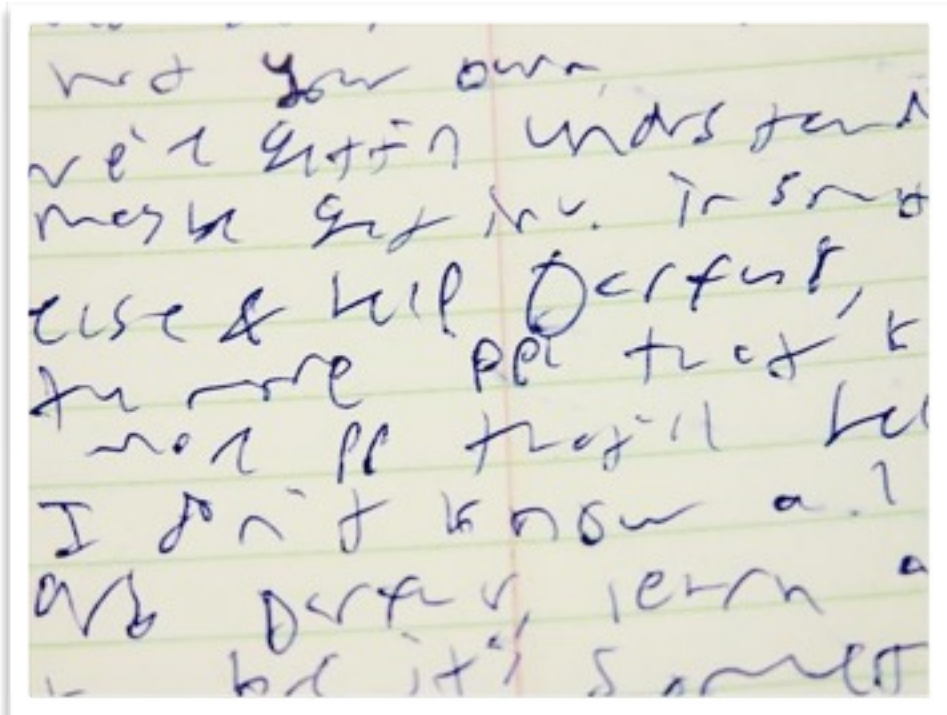

1. Programirajte

(čak i ako se ne želite time poslije baviti)

2. Programirajte uredno

Stil i konzistentnost

Konvencije

(sami sebi čete zahvaliti u budućnosti)

3. Budite lijeni

I choose a lazy person to do a hard job. Because a lazy person will find an easy way to do it.

— Bill Gates

(ali samo radi produktivnosti)

4. Čitajte tuđi kod

(i budite kritični prema njemu)

5. Budite znatiželjni

(i ne brinite o tehnologijama)
